

TIPS TO PREVENT COSTLY REPAIRS

CAR CARE 101

DON'T IGNORE THE CHECK ENGINE LIGHT

29% of people admit to ignoring their "Check Engine" light for a month or more

Average car currently has **3** things that don't function as they should

There are at least **1,283** possible reasons the Check Engine light could come on

27% of the time, this light simply indicates a loose or damaged gas cap

STAY ON TOP OF OIL CHANGES

Average cost of a multi-point oil change service using standard oil

\$36.82 vs. \$70.31

Average cost of multi-point service using Full Synthetic oil

22% of vehicles have dirty or low engine oil

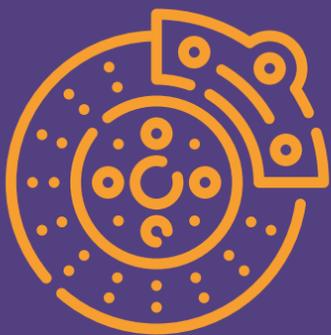

Avg. yearly cost of oil changes

\$120 vs. \$4,000

Avg. yearly cost of engine repairs due to lack of maintenance

PRIORITIZE BRAKE MAINTENANCE

Most manufacturers recommend changing brake pads and brake fluids every **25,000 miles**

Avg. axle replacement cost **\$250**

vs.

\$1,300

Average cost to repair brake caliper & rotors if the brake pads get too worn.

Brake pads or shoes last

anywhere from **20,000** miles to **80,000** miles on average

Recommended to have your brakes checked **twice** a year

REPLACE OLD OR DIRTY SPARK PLUGS

Small problems lead to bigger problems if not

fixed. A simple **\$250** spark plug replacement

could turn into a **\$1,000** repair of the spark

plugs and ignition coil.

Based on spark plug type, the recommended replacement interval

is between **30k** miles and **100k** miles.
